ASIAN TRUCKER WELCOMES YOU TO THE MALAYSIA COMMERCIAL VEHICLE EXPO 2022

Dear Ladies & Gentlemen,

Welcome to the fifth instalment of the region's largest commercial vehicle exhibition, organised by Asian Trucker. This may not only be a milestone for us, but one of the most significant events for the industry in view of the impact that the pandemic had. Today, we celebrate an industry that has not only been resilient, but also instrumental in keeping the economy running. Together, we are putting the spotlight once again on the heroes that have ensured that the shelves were well stocked, goods were moved and people could move about when they needed to travel. This event is dedicated to those that kept the wheels rolling, from the technicians to the drivers, from innovators that came up with new ways to enhance transport businesses to the OEMs. It is a three day celebration of the commercial vehicle industry, no matter how big or small the contribution has been since our world was gripped by Covid-19.

A lot has happened and several exhibitors are showcasing innovative and ground-breaking new products. Without avenues to introduce their products, these have until now needed to find the right platform to be fully introduced, experienced and promoted. As drivers and business owners you will surely want to get close to the trucks that are being displayed here as they are feature-packed and evolutions of the vehicles that were shown in our last instalment of MCVE. Suppliers to the truck and bus manufacturers are also lining the hall with their booths, equally packed with exciting new services and products to be explored. Setting up the event was almost like a re-exploration of the industry.

The last two years in particular have seen a renewed understanding and appreciation of the drivers: bus captains and truck pilots. We honour them with activities for those that take time out of their schedules to get involved with the exhibitors to learn about their future tools of the trade. Society has also acknowledged that drivers can make a difference when it comes to the reduction of harmful emissions and the reduction of

wastage. We appeal to all of you to support our drivers in their ambition to further their skills and to be the best they can be. While the machine is certainly a crucial asset, it is the human that, still, remains as having the biggest impact to the bottom line, being it in monetary terms or achieving global goals, such as emission reduction.

As a delegate you will find that this year's event is having a slightly different feeling from our usual shows. While we are certainly all very enthusiastic, we have to ensure the safety of everyone. Therefore, the fringe programme has been adjusted accordingly. However, we are confident in saying that there is a lot going on and that there will be a lot to be seen. It is thanks to our exhibitors that have given us the vote of confidence in the event. Additionally, several brands came forward with creative sponsorship ideas to make the Malaysia Commercial Vehicle Exhibition yet again a resounding success. It is highly appreciated that those that are exhibiting here have had the vision and foresight to support our ambition.

In addition to the delegates and exhibitors supporting us, we would like to extend our appreciation to the government agencies that have lent their support. They too, have been instrumental in the re-building of the economy with initiatives and activities. On behalf of Asian Trucker and Malaysia's commercial vehicle industry, we would like to express our gratitude for the support.

To all delegates we say thanks for your visit; we appreciate the support of exhibitors and supporting organisations without whom, this event would not have been possible. It is our hope that you will enjoy the exhibition. As we celebrate the industry, we wish you have a successful time at the Malaysia Commercial Vehicle Industry.

Stefan Pertz
Editor in Chief, Asian Trucker, Asian Buses
Organiser, Malaysia Commercial Vehicle Exhibition 2022

ASIAN TRUCKER

Asian Trucker Media provides a full range of communications channels for the commercial vehicle industry. Our platforms are aimed primarily at fleet operators and driver-owners in South East Asia. Our print magazine, Asian Trucker, is a premier business and product magazine and features issues concerning drivers through to logistics and infrastructure executives. We publish four editions: Malaysia (Eng), Singapore (Eng), Thailand (Thai) and Asian Buses (Eng). In addition, we host seminars, publish E-Newsletters, provide advertising possibilities via websites and organise and manage South East Asia's largest commercial vehicle exhibition.

Asian Trucker Malaysia has been published since 2009. In December we will celebrate 50 issues of the Malaysian magazine. The Singapore edition of the magazine has been published 26 times over the past seven years with Thailand being active for over six years and 23 issues so far. To round things off, an annual Trailer Special is published in Malaysia.

Addressing the needs of this market, we added the Bus magazine in 2014 which we have published 20 times. Initially, this publication was called "Asian Trucker Bus Special". However, in January 2015 we have renamed it to make it a stand-alone publication.

Also added in 2014 was the Asian Trucker Drivers Club, which is a non-for-profit component of our business. Here we seek to enhance the skills and the social standing of truck drivers. This initiative is funded mainly through sponsorships and has seen several hundred drivers join in the first year of its existence.

Asian Trucker Media is an independent company, established in Malaysia and being the holding company for Asian Trucker Singapore and Asian Trucker Thailand.

Asian Trucker is the only regional and cross-country magazine of this kind. Many companies keep complete collections of the magazine as reference libraries.

Our exhibition, MCVE, is currently the largest exhibition in South East Asia dedicated to the commercial vehicle industry and it is going to be the fourth instalment in June 2019.

We are happily exhibiting at our fourth MCVE!

OKO offers the very latest tyre sealant technology – no latex – which means it's very effective, long lasting, easy to work with and safe. Made in the UK since 1978 our sealants are now distributed in over 90 countries. OKO has been in Malaysia since 2016.

We offer quality sealants for almost all types of tubeless tyres. Effectively sealing punctures while you travel, so saving tyres by preventing expensive 'run-flats'. This translates to increased efficiency and reduced costs.

For this MCVE we support Motorbike riders involved in the Trucking Industry, with our OKO for Motorbikes. Our sealant will seal multiple punctures to 5mm with tubeless tyres; it will last the life of the tyres and will create no rim corrosion. Look out for our OKO Motorbike fitting station!

Come see what we have to offer!

Email: cpc_auto@yahoo.com

Malaysia's road transport business is a well-developed industry supported by a good infrastructure network. Most highways are interlinked. With the growing transportation market, CPC established in 2008 that focused on the sale and service of truck wheels and parts, and towing accessories.

Following the rise of China's heavy duty commercial tyre technology, the leading position held by Japan and Europe was no longer as stable as before. As the tyres from China fetched with lower prices and their quality had improved, CPC took the opportunity to introduce China tyres to the Malaysian market in 2009. In mean time 2010, CPC Tyre (M) Sdn Bhd was established to market with these tyres. In subsequent years, CPC Tyre explored the potential of various China brands, each with its advantages and shortcomings, by marketing them. However in 2015, the company collaborated with Jiangsu General Technology Co Ltd to exclusively distribute and market the CTM range of included light duty and heavy duty commercial tyres in Malaysia.

As for its business in the trailer parts division, CPC Tyre originally began selling and supplying selected parts to body builders. After being in this business for many years, the company understood that body builders need to streamline their procedures to save time and improve building efficiency. Therefore, CPC Marketing Sdn Bhd established in 2017, In addition to its existing parts supply, the company started producing large truck and trailer components such as axles and pneumatic suspensions. With this expanded parts production, it has become more convenient for buyers and customers to shop for items.

Contact: Frank Maergner (Sales Director)

Email: f.maergner@hengst.de

The concepts and engines used for commercial vehicles are marked by continuous advancement and ever-growing requirements. The main objectives driving these developments are CO2 limits, lower fuel consumption, reduced operating costs and modular engine families for different needs.

Such objectives result in downsized engines, changes in oil quality and extended service intervals. These goals constantly pose new requirements on filtration, such as the need to deliver a high filtration rating at maximum dust pick-up capacity or enhanced differential pressure characteristics under high loads. Vital in the segment of fuel filters is the ability to deliver effective water separation that will safely protect complex injection systems

Our Independent Aftermarket product portfolio carries over 2,000 filter products for automobiles, commercial vehicles and off-road segment of all manufacturers worldwide. Hengst Filtration provides an almost completely full range of applications in original equipment manufacturer quality (OE) to its worldwide dealer network.

Hengst does this successfully since 1958 to OEM's and the Independent-Aftermarket.

We lead the world in filtration, making our planet a purer place.

ROADONE
SAFE FIRM POWER

ROADONE Tyres is one of the leading tyre brand manufacturers in China. ROADONE tyres are high-quality European engineering commercial tyres produced by Hixih Group, which has more than 10 years of successful cooperation with Pirelli Group. Founded in 1989, Hixih Group has now become the main manufacturer of tyres and industrial conveyor belts after more than 20 years of high-speed innovation and development. Furthermore, Hixih Group is "the world's important rubber industrial base", "the world's largest conveyor belt manufacturer", "top tyre manufacturer", and "the world's largest rubber engineering product production base". Hixih Group ranked 292nd among the top 500 Chinese companies in 2016.

Roadone tyres was selected as original equipment by China leading trucks manufactures such as XCMG and Sinotruck. This shows that the quality of ROADONE tyres has been recognized by the local market.

Kitar Teliti Sdn Bhd is that sole importer and distributor of ROADONE tyres in Malaysia. Our core business activity is to import and distribute major international tyre brands in Malaysia. We are operating with an extensive retail network in

Malaysia and developing our e-commerce platform. We offer a comprehensive range of products, such as heavy truck tyres, light truck tyres, bus tyres, earthmover tyres, forklifts tyres, off-road tyres, agricultural tyres as well as passenger cars tyres.

Contact: Ms. Nuur Sakinah Azman
(Head, Corporate & Knowledge Management Unit)
Email: nuursakinah@miros.gov.my

The Malaysian Institute of Road Safety Research (MIROS) was established in 2007 as an agency under the Ministry of Transport Malaysia to serve as a central repository of knowledge and information on road safety. The findings derived from research and evidence-based intervention programmes provide the basis for the formulation of new strategies, legislations, policies, and enforcement measures, governing road safety at the national level. Principally engaged in research, MIROS collaborates closely with local and international government agencies and private bodies to further the cause of road safety.

In 2014, the ASEAN Transport Ministers had appointed MIROS as the ASEAN Road Safety Centre. The aims of this centre are to promote and provide knowledge on road safety issues among ASEAN Member States which included road traffic laws and regulations, data management, standards development, and road safety awareness and education.

PETRONAS AireBlue. Reduce Emissions Today for a Greener Tomorrow.

PETRONAS AireBlue, a solution for cleaner air. It is quality diesel exhaust fluid made up of high-purity ammonia based reagent. PETRONAS AirBlue works with a vehicle's Selective Catalytic Reduction (SCR) system to convert Nitrogen oxides emission into harmless nitrogen and water. It can be used by any vehicle that run on Euro 4, 5 and 6 Diesel.

PETRONAS AireBlue is produced using PETRONAS unique proprietary process that ensures; very low biuret content which prevent unwanted side reaction that clog the catalytic converter, minimal presence of metal and other impurities that poison the Selective Catalytic Reduction (SCR) system. PETRONAS AireBlue also ensures a trouble-free operation and prolongs the life of diesel vehicle's catalytic converter.

Tritech Safety Sdn Bhd is Malaysia's leading manufacturer and distributor for vehicle safety, traffic management and personal protective equipment (PPE) products.

We offer wide range of safety products for different types of vehicles, including SIRIM-certified retro-reflective vehicle conspicuity markings (MS 828:2011) and advance warning triangle (MS 2294:2010) for commercial vehicles. We also provide APAD-requirement safety products. Tritech offers vehicle graphics design and lightbar installation for emergency response vehicle as well.

Tritech has a comprehensive range of quality and innovative traffic management products for use on highways, construction zones and car parks.

Our PPE products, especially high visibility vests and rainwear conform to Malaysian Standards MS 1731:2004. Our products help to ensure the safety of the personnel who are working in high-risk areas. We are able to custom-made our high visibility vests and rainwear to suit your requirements.

SPECIAL OFFER FROM ASIAN TRUCKER!

**ASIAN
TRUCKER**

Books dedicated to wheel alignment, more so on wheel alignment for commercial vehicles, are very rare indeed. You will not find them in bookstores. Wong Thiam Boon has poured decades worth of experience into this book and you can now buy it from Asian Trucker for a special price.

If you want to learn more about how to reduce the cost of operating your fleet through correct wheel alignment, then wait no longer and grab a copy of this practical guide book.

USP: RM 120.00

Special offer from Asian Trucker: RM 100.00 (During MCVE)

"This practical and resourceful book will be an asset to any fleet operator or workshop that wants to improve the performance of commercial vehicles. It is TB Wong's experience of decades working with wheel alignment systems that shines through and makes this a must-have item for anyone that is serious about their transportation business. The industry had to wait far too long for a resource like this and I am excited to see TB Wong's knowledge now being available to the market."

Stefan Pertz,
Editor, Asian Trucker Malaysia
Editor, Asian Buses

Available at the Asian Trucker Café at MCVE 2019.
